

| Name | Rangga Meidianto Asri | | | |
|------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|----------------------------------------------------------------------------------|------------|
| Subject area | Pharmaceutical sciences | | | |
| Academic Career | Appointment | University | year | |
| | | | | |
| | Post-doctoral qualification | University | year | |
| | | | | |
| | Doctoral qualification | University | year | |
| | | | | |
| | Magister (field) | University | year | |
| | | | | |
| | Professional (Apothecary) | University | year | |
| | Pharmacist | Universitas Hasanuddin | 2013 | |
| Undergraduate degree (field) | University | Year | | |
| Pharmaceutical | Universitas Hasanuddin | 2011 | | |
| Employment | Position: | Employer | Period | |
| | Lecturer | Faculty of Pharmacy – Universitas Hasanuddin | 2014 - present | |
| Research and Development Projects over the past five years | Projects | Period: | FUNDING | |
| | Phytochemical Analysis and Brine Shrimp Lethality Test (Bst) of Extract and Fraction of Green Seaweed (<i>Ulva Reticulata</i>) | 2011 | IMHERE World bank | |
| | “Effect of Cocoa Pudukhusk Extract on Increasing IgG and IgM Concentration in Mice Induced by Sheep Erythrocyte as Antigen, | 2015 | Junior Lecturer Research Grant/PDP Universitas Hasanuddin | |
| | “Development of Ethosomal Delivery System as Penetration Enhancer of Polyphenolic Compounds in Rambutan Peel (<i>nephelium lappaceum</i> L.) Extract from South Sulawesi as Natural anti Aging Gel,” The Use of <i>Drosophila Melanogaster</i> as an Infected Animal Model for the Evaluation of Antibacterial Activity from <i>Ulva reticulata</i> Extract | 2017 | Kementerian Kesehatan Republik Indonesia Maritime Specific Research Grant | |
| | Project name | Journal | Year | Partner(s) |

| | | | | |
|---------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|----------------|--------------------------------------------------------------------------------------------------|
| Publications | In vivo Antibacterial Activity of Green Algae <i>Ulva reticulata</i> Against <i>Staphylococcus aureus</i> in <i>Drosophila</i> Model of Infection | Pharmacognosy Journal, 2018, 10, 5, 993-997. DOI: 10.5530/pj.2018.5.169 Published: August 2018 Type: Original Article | 2017 | Firzan Nainu, Rangga Meudianto Asri, Aryadi Arsyad, Marianti Anggreni Manggau, Muhammad Nur Amir |
| | | | | |
| | Organization | Position | Period | |
| Participations in specialist organizations over the past five years | Association of Pharmacists of Indonesia | Member | 2011 – Present | |
